E-Mail: Intertek India

Our reference no.	: PI2607020036		
Product	: Honey		
Sample description / Batch	: IFSH-260623107 - Multiflora Honey - B. No: M400 - MFG: June 26		
Sample received on / transported by	: 30.06.2026 via Parcel service	Seal	: none
Sample temp. when received / stored	: RT	Sampling	: Client
Packaging / Quantity	: Dispenser / ca. 450g	Start / End of analysis	: 02.07.2026 / 08.07.2026

ANALYSIS REQUESTED: Honey profiling by NMR (101750)

Parameter	Result	Method
NMR profile	typical	PM DE01.308:2022-05 (a) ¹
Detection of foreign sugars	no	PM DE01.308:2022-05 (a) ¹
Verification of geographical origin	consistent	PM DE01.308:2022-05 (a) ¹
Verification of botanical variety	not performed	PM DE01.308:2022-05 (a) ¹
Information about the geographical and/or botanical origin can have a significant influence on all aspects of the Bruker Honey Profiling analysis and should always be provided/incorporated in case it is available. Intertek does not take responsibility for incomplete information provided by the customer.		
(a) : accredited method. (na) : not accredited method. (1) Bruker Honey Profiling 3.1.4/ expert assessment This document may only be reproduced in full. The results given herein apply to the submitted sample only.		

Interpretation:

The NMR profile is typical for honey. There were no significant deviations detected according to reference database entries. Regarding the examined parameters the sample corresponds to the legal regulations (Council Directive 2001/110/EC dated Dec. 20th, 2001 relating to honey; Article 1 in connection with Annex II).

The proposed geographical origin "India" could be confirmed after applying statistical classification models and expert assessment.
